About SCIC

We are a new generation development consulting company based in London. We undertake extensive research on social, environmental, economic and political development challenges in the mix. We undertake the crafting of integrated development strategies for implementation; and provide advice to governments, businesses and individuals focusing on needs and peculiarities of the customer. Our key drivers are high ethical values, quality and social enterprise.

From purchasing and supply to value creation through effective inventory management

Introduction

Inventory management is an important part of and determinant of the value chain. This is considering service and manufacturing environments. Analysing the benefits and costs of implementing "JIT" is an important role of managers and administrators in private and public sector organisations. This training examines the complicated functions of purchasing and supply and helps to organise and balance processes and value delivery traffic in different environments, optimally.

Objectives

This training aims to expose participants in service and manufacturing companies share similarities and experiences through use of best practice inventory management that supports finished products to market, reducing input and in process inventory stocks to optimum levels at any given time. This will contribute to better cash cycle management and free cash for other investments.

Who will benefit?

- Store and inventory control officers
- Internal control and accounting officers and executives

Expected benefits to participants

- Understand and decide on the best inventory management techniques for your organisation
- Enable participants with the skills required to analyse and forecast input and output demand against organizational objectives
- Enable participants with skills that they require to save costs through optimal inventory management and transfer value to stakeholders
