About SCIC

We are a new generation development consulting company based in London. We undertake extensive research on social, environmental, economic and political development challenges in the mix. We undertake the crafting of integrated development strategies for implementation; and provide advice to governments, businesses and individuals focusing on needs and peculiarities of the customer. Our key drivers are high ethical values, quality and social enterprise.

Health and Safety compliance for workers with Health and safety responsibilities within organisations – level 2

This training is part of the continuous development requirement for Health & Safety and would require follow up refresher courses as legislations and regulations change within the operating environment. In the UK, non compliance with H & S requirements could lead to imprisonment or criminal conviction (jail sentence) and or fines for directors and/or employers, and more so in the case of injuries and considered employee and public safety risk exposures.

Course introduction

This is a short interactive course with the audiovisual aided case studies to suit participants. The course is designed to help employers and their representatives or employees with Health & Safety responsibilities understand their roles and compliance measures required of them in providing a safe working environment. In the UK, non compliance or failure of senior management to manage Health & Safety issues resulting in fatality may attract a jail term and/or fine under the new legislation, "Corporate Manslaughter Act 2007".

Course objectives

To ensure that safety requirements are appreciated, adhered to and enforced by people employed in positions of authority and to enable them to review their own departmental systems for safety, introducing new controls or implementing changes as appropriate to ensure safety in the workplace.

Who should attend this course?

Senior management and employees with health and safety responsibilities

Course presentation approach

Practical approach with audiovisual case studies aided

Course leaders

Instructors have been carefully chosen from individuals with backgrounds in academics, built environment, manufacturing, oil and gas sector, and health and safety consultants.

Course contents

- Introduction and Overview
- Risk Assessment (specific to industry)
- Risk Control
- Health and Safety Legislation
- Common Hazards (specific to industry)
- Investigating Accidents and Incidents
- Measuring Performance
- Environmental Protection

Travel

Participants who would be coming from outside London or overseas are encouraged to make personal arrangements early. We are able to provide general advice where this may be required.

Location of Training

This training can be organised in London, United Kingdom or overseas, in-house

Duration of training (Effective contact time)

4 day including tea breaks

Learning outcome

On successful completion of the course, trainees should be able to:

- Explain the concept of 'working safely' and the components of a recognised safety management system
- Identify the data and techniques required to produce an adequate record of incidents and demonstrate the procedure for accident investigation, recognising the human factors involved
- Describe statutory requirements for reporting and procedures for checking, for non-reporting and describe the methods of basic trend and epidemiological analysis for reactive monitoring data
- Define 'hazard' and 'risk', and describe the legal requirements for risk assessment as well as demonstrate a practical understanding of a quantitative risk assessment technique and the data required for records
- Describe workplace precaution hierarchies, and prepare and use active monitoring checklists and implement schedules for active monitoring, recording results and analysing records
- Outline the main provisions of the Health and Safety at Work Act 1974 and the Management of Health and Safety at Work Regulations 1999 and also, outline the main provisions of the Corporate Manslaughter Act 2007 and compliance checklist under this new legislation.
- Outline relevant health and safety legislation, codes of practice, guidance notes and information sources such as the Health and Safety Executive

Course fees

The fees below are for standard training in London, United Kingdom and would cover instructing, course materials, certificates, and light refreshments. Courses delivered outside London and overseas would consider travel costs and insurance along with standard fees.

Course fees for developing countries requiring Health & Safety training in home countries would be promoted as part of our social enterprise initiative while ensuring quality training. Costs would therefore be kept low and as negotiated with interested organisations.

Standard fees:

Individuals – £700.00

Organisations sponsoring five or more persons (10% discount) - £630.00

Early bird discount (10%) – £70.00

Please note:

Open courses are advertised regularly on our website and the next dates will soon be decided. Please send us an email at training@scic.co.uk if you would be interested in attending one of our courses soon so that we can contact you directly early enough to benefit from discounts. This course is promoted subject to our terms and conditions attached to this advertisement.
