Partnering to tackle the world's development problems!

About SCIC

We are a new generation development consulting company based in London. We undertake extensive research on social, environmental, economic and political development challenges in the mix. We undertake the crafting of integrated development strategies for implementation; and provide advice to governments, businesses and individuals focusing on needs and peculiarities of the customer. Our key drivers are high ethical values, quality and social enterprise.

Understanding and applying lean concept in service and manufacturing organisations

Introduction

Operating lean means continuous identification and elimination of waste along the value chain. The overall result is more efficient use of input resources to produce superior output. This principle can apply to manufacturing and services. How can this be? How can you use less to produce more and better quality? Are there risks? Are there trade-offs? What are the techniques, and if so, why not? Well, this training has been designed to enable you support your organisation to achieve just that. The result will be improvement in output levels, increase earnings and transfer of cost savings on quality products and services to customers. Does this make sense? These certainly could lead to customer loyalty by protecting their interest. This can mean competitive advantage.

Objectives

This training is intended to enable participants understand and apply efficient processes in both service and manufacturing environments. The principles in both environments are the same and participants would learn from a cross sectoral environment. The training will support participants acquire skills to drive high performance with relatively low input, eliminate waste and reduce lead time whether in services or manufacturing. It is hoped that at the end of the training participants would be able to design strategies for implementation at work, which will result in better supplies and inventory management, improved manufacturing line that is risk free and ensures consistently high quality products to market, better customer service and very many satisfied customers

Who will benefit?
