Partnering to tackle the world's development problems!

About SCIC

We are a new generation development consulting company based in London. We undertake extensive research on social, environmental, economic and political development challenges in the mix. We undertake the crafting of integrated development strategies for implementation; and provide advice to governments, businesses and individuals focusing on needs and peculiarities of the customer. Our key drivers are high ethical values, quality and social enterprise.

Training:

Project management for the public sector

Project failure occurs quite commonly and often may result in wastage of scarce resources and inability to deliver on targets. Project managers should therefore be conversant with the life cycle of the project that they manage and apply standard protocols to see projects through initiation, design & development, implementation and post implementation audits. This training will involve visits to projects sites for practical experiences.

Suitability

Participants should be individuals involved in managing and monitoring public sector projects.

Duration and delivery location

3 days in the UK. It can be organised overseas

Cost

The cost of packaged training for **groups of 10** will cover lodging, feeding, course materials, tutorials and **3 days** London city transportation including airport pickup. Please contact us to negotiate a quote.
